GS-03

DigiTool® Management Software

DigiTool®
Digital Data acquisition

Rosslare's GS-03 DigiTool® Management Software is an advanced software suite that manages the DigiTool Guard Patrol system for small-scale to large-scale topologies. The user-friendly software uses database storage for downloaded data.
Rosslare's DigiTool Guard Patrol system is the best, cost-beneficial, guard patrol management platform available with a complete range of professional leading-edge high-quality, high-performance products.

GENERAL DESCRIPTION

Rosslare's GS-03 is designed to seamlessly manage the DigiTool Guard Patrol system. It enables key staff duties to be monitored and data captured for performance reporting.

During the patrol (tour), staff members collect location IDs and specific status events by placing their readers (GC-01) on location tags (GA-01) or event wallets (GA-02, GA-12).

The collected information is then transferred to the GS-03 management system by placing the reader in the docking base (GC-02) to activate the data upload.

Unlike paper-based duty tracking systems, information within the GS-03 management system is centrally accessible, and information can be manipulated quickly and easily for improved management decisions.

MAIN FEATURES

- Full suite of reports/graphical analysis
- Supports over 500 guards, up to 10,000 locations

- Quick and easy implementation – fully networked or standalone
- Supports multiple sites, multiple buildings
- Data transfer communication is supported by direct USB connection
- Flexible, schedule-based tour planning
- Wizard-driven GUI for creation of most objects
- Tree-view based object structure

▪	Minimum PC Requirements	Minimum: Intel dual core 2.4 GHz or equivalent Recommended: Intel core i5 or i7 CPU
▪	Memory	Minimum: 2 GB Recommended: 8 GB
▪	Network	LAN card required for TCP/IP networking
▪	Hard Disk Space	5 GB minimum
	SYSTEM COMPONENTS	This product integrates with the other DigiTool family of Guard Patrol products: ▪ GC-01 Data Acquisition Reader Base ▪ GC-03 Data Acquisition Reader Charger ▪ GA-01 Location Tag, available in several colors ▪ GA-02 Event Wallet ▪ GA-12 Digital Event Wallet ▪ AT-32B Key Fob ▪ GA-06 Leather Holster

ABOUT ROSSLARE SECURITY

Rosslare Security Products manufactures and markets high-quality security products via its worldwide offices and channel partners. Since 1980, Rosslare has offered high-quality systems for enterprise, small business, and residential applications. With Rosslare, you receive the best of all worlds: world-class product engineering and design; professional customer service spanning the globe; and the quality and affordability of a vertically integrated and self-owned manufacturing facility. Our expansive product range features much more than access control solutions and guard patrol management systems; we also offer applications software – such as License Plate Recognition, Time & Attendance, and DVR/alarm integration.
